

# Commissioner Information

Commissions are defined in this case as any product that does not currently exist in any online shop listing or requires extensive design processes to reach the desired result(s). They can be inquired about via email or direct messaging on social media platforms.

Commissions are accepted and greatly appreciated, but there are restrictions that apply to them.

Pink Petal Development and their affiliates do NOT promote hateful or bigoted messages – commissions containing content like this are not taken into consideration for ANY reason.

There are rules that apply to Pink Petal Dev for sending commissions including, but not limited to...

- Weapons resembling firearms MUST have a bright orange tip on them
- NO METAL PROPS are created or sold by this shop
- We do not sell props that resemble weapons to anyone under the age of 16 years old

Commission prices and content must be discussed and agreed upon by both the buyer and seller and a 50% *nonrefundable* deposit of the agreed upon price must be submitted via the agreed upon payment method prior to any work being done on any front of the commission. The cost of the commission DOES NOT include shipping – this is a separate charge the buyer is responsible for.

All designs for commissions are approved by the buyer prior to the start of the printing and finishing processes.

We do our best to maintain contact throughout the creation of every commission and always respond as quickly as possible to questions and inquiries.

Prices are based on complexity, finish, and item size.

If a commission is not paid in full within 6 months of order placement, the order is cancelled and any deposits are forfeited (unless an alternative arrangement has been made and agreed upon between both the buyer and seller).

When inquiring about commissions, please include reference pictures for the item you are requesting and information such as the size of the item, what it will be used for, what it's referencing, etc.

Thank you for your support!
